Walk Behind Lawn Mower
Owner/Operator Manual

Models
911110 - SP 21LM
911111 - SSP 21LM
911112 - DSP 21LM
911113 - DESP21LM

Transfer model & serial number label from product registration here.

Coller l’autocollant du modèle et du numéro de série dans cet encadré.
Transferir aquí la etiqueta del modelo y número de serie del registro del producto.
THE MANUAL
Before using the unit, carefully and completely read your manuals. The contents will give you an understanding of safety instructions and controls during normal operation and maintenance.

All reference to left, right, front, or rear are given from the operator’s position, facing the direction of forward travel.

SERVICE AND REPLACEMENT PARTS
When ordering replacement parts or making service inquiries, know the Model and Serial numbers of your unit and engine. Numbers are located on the product registration form in the unit literature package. They are also printed on a serial number label, located on the frame of your unit (Figure 1).

PRODUCT REGISTRATION
The Ariens dealer must register the product at the time of purchase. Registering the product will help the company process warranty claims or contact you with the latest service information. All claims meeting requirements during the limited warranty period will be honored, whether or not the product registration card is returned. Keep a proof of purchase if you do not register your unit.

Customer Note: If the Dealer does not register your product, please fill out, sign and return the product registration card to Ariens or go to www.ariens.com on the internet.

UNAUTHORIZED REPLACEMENT PARTS
Use only Ariens replacement parts. Replacing any part on this vehicle with anything other than an Ariens authorized replacement part may adversely affect the performance, durability, or safety of this unit and may void the warranty. Ariens disclaims liability for any claims or damages, whether warranty, property damage, personal injury or death arising out of the use of unauthorized replacement parts. To locate your nearest Ariens Dealer, go to www.ariens.com on the internet.

DEALER DELIVERY
Dealer should:
1. Check that all assembly and adjustments have been properly completed.
2. Fill out Original Purchaser Registration Card and return the card to Ariens.
3. Explain Ariens Limited Warranty Policy.
4. Explain recommended lubrication and maintenance. Advise customer on adjustments. Remind customer to change oil in 4 cycle engine crankcase after first five (5) hours of operation.

5. Instruct customer on controls and operation of unit. Discuss and emphasize the Safety Rules. Give customer Owner/Operator, Parts, and Engine manuals. Advise customer to thoroughly read and understand them.

**DISCLAIMER**

Ariens reserves the right to discontinue, make changes to, and add improvements upon its products at any time without public notice or obligation. The descriptions and specifications contained in this manual were in effect at printing. Equipment described within this manual may be optional. Some illustrations may not apply to your unit.

---

**SAFETY**

**WARNING:** This cutting machine is capable of amputating hands and feet and throwing objects. Failure to observe the safety instructions in the manuals and on decals could result in serious injury or death.

Slopes are a major factor related to slip and fall accidents. Operation on all slopes requires extra caution.

Tragic accidents can occur if the operator is not alert to the presence of children. Never assume that children will remain where you last saw them.

Gasoline is extremely flammable and the vapors are explosive, handle with care.

Stop unit and engine, remove key (if equipped) and allow moving parts to stop before leaving operator’s position.

**NOTATIONS**

**NOTE:** General reference information for proper operation and maintenance practices.

**IMPORTANT:** Specific procedures or information required to prevent damage to unit or attachment.

**PRACTICES AND LAWS**

Practice usual and customary safe working precautions, for the benefit of yourself and others. Understand and follow all safety messages. Be alert to unsafe conditions and the possibility of minor, moderate, or serious injury or death. Learn applicable rules and laws in your area.

**REQUIRED OPERATOR TRAINING**

Original purchaser of this unit was instructed by the seller on safe and proper operation. If anyone other than the original purchaser will use the unit, ALWAYS provide this manual and any needed safety training before operation.
S A F E T Y  D E C A L S  A N D  L O C A T I O N S
ALWAYS replace missing or damaged safety decals. Refer to Figure 2 for safety decal locations.

1. **DANGER!**
**TO AVOID SERIOUS INJURY OR DEATH**
- Read the operator’s manual.

OL.1801

- Keep children and others away from unit while operating.

OL.4370

- Never direct discharge toward other people. Thrown objects can cause injury.

OL.0910

- Do not operate mower unless guards are in operating position or entire bagger is attached.

OL.640

2. **DANGER!**
**KEEP HANDS AND FEET AWAY**
Do not operate mower unless guards are in operating position or bagger is attached.

3. **CAUTION!**
- Bag is subject to wear and deterioration.
- Check bag frequently, replace when necessary.
- Use original bag to comply with safety specifications.

S A F E T Y  R U L E S
If unit is to be used by someone other than original purchaser; loaned, rented or sold, ALWAYS provide this manual and any needed safety training before operation.

Learn applicable rules and laws in your area, including those that may restrict the age of the operator.

Read, understand and follow all safety practices in Owner/Operator Manual before beginning assembly. Failure to follow instructions could result in personal injury and/or damage to unit.
If the operator or the mechanic cannot read the manual, it is the owner’s responsibility to explain it to them. Only the user can prevent and is responsible for accidents or injuries occurring to themselves, other people or property.

ALWAYS remove key (if equipped) and disconnect wire from spark plug before assembly. Unintentional engine start up can cause death or serious injury.

Complete a walk around inspection of unit and work area to understand:
- work area
- your unit
- all safety decals.

Clear work area of stones, sticks, wire and foreign objects which might be picked up and thrown. Tall grass can hide obstacles.

Know the work area. Stay alert for holes, rocks, rough terrain and hidden hazards.

Keep away from drop-offs, ditches, or embankments that could cause operator to lose footing or control of unit.

ALWAYS be aware of traffic when operating along streets or curbs.

Keep work area clear of all persons, children and pets.

Keep children out of the work area and under the watchful care of a responsible adult.

ALWAYS operate unit when there is good visibility and light.

DO NOT mow wet grass.

ALWAYS be sure of your footing. Keep a firm hold on handlebar. Walk, NEVER run.

Engine/blade control feature on mower stops engine and blade within 3 seconds whenever operator releases handlebar. Check this feature frequently. If feature fails to operate, disconnect spark plug wire and adjust or have it repaired before using unit.

Only trained adults may operate or service unit. Training includes actual operation. The owner is responsible for training users.

NEVER operate after or during the use of medication, drugs or alcohol. Unit requires complete and unimpaired attention.

NEVER allow children to use or service mower.

ALWAYS keep hands and feet away from rotating parts. Rotating parts can cut off body parts.

ALWAYS keep hands away from pinch points. Fumes from engine exhaust can cause death or serious injury. DO NOT run engine in an enclosed area.

ALWAYS protect eyes, face, and body with adequate safety gear and protective clothes. Wear sturdy footwear, gloves, a hard hat and safety goggles or safety glasses with side shields while operating mower.

Wear appropriate hearing protection.

NEVER operate mower barefoot or when wearing open sandals or canvas shoes.

NEVER wear loose clothes, long hair or jewelry that may get caught in rotating parts.

ALWAYS stand clear of discharge when operating unit.

NEVER direct discharge toward bystanders. Operator is responsible for bystander safety.

DO NOT touch hot parts. Allow parts to cool.

Keep safety devices or guards in place and functioning properly. NEVER modify or remove safety devices.

Read, understand, and follow all instructions in the manual and on the machine before starting. Understand:
- How to operate all controls
- The functions of all controls
- How to STOP in an emergency.

DO NOT attempt to start your engine until you know what the controls do and how they work.

DO NOT tilt mower when starting it.

Keep feet away when starting engine.

DO NOT start the engine or operate mower without side discharge cover or side discharge deflector installed.

Never leave a running unit unattended.

Take all possible precautions when leaving unit unattended.

ALWAYS shut off engine, remove key (electric start models) and disconnect spark plug wire to prevent accidental starting or unauthorized use.

Stop engine if anyone enters the work area. NEVER attempt to make any adjustments to unit while engine is running (except where specifically recommended). Stop engine, remove key (electric start models) and wait for all moving parts to stop before servicing.

DO NOT make cutting height wheel adjustments while the engine is running.

If you strike an object, or if equipment vibrates abnormally, stop engine at once, wait for moving parts to stop and disconnect wire from spark plug. Repair any damage before restarting unit.

Keep rear door closed when engine is running unless the grass bag is in place.
Stop engine before removing and emptying grass bag.
When mulching or bagging, ALWAYS install discharge cover.
When side discharging, ALWAYS install side discharge deflector.
ALWAYS shut off engine, allow blade to stop and disconnect spark plug wire before clearing clogs or cleaning unit.
Check grass bag for wear, damage, and/or deterioration. Replace only with Ariens original equipment replacement parts for safety.
To reduce fire hazard and overheating, keep equipment free of grass, leaves, debris or excessive lubricants.
Use extra care when approaching blind corners, shrubs, trees, or other objects which may obscure vision.
DO NOT mow at too fast a rate. DO NOT change engine governor setting or overspeed the engine.
Do not operate mower on gravel or loose material such as sand. Stop mower when crossing drives, walks, or roads to prevent damage or injury from thrown objects.
DO NOT pull mower backwards unless absolutely necessary. Look down and back, especially for small children, before and while moving backwards.
On self-propelled models, releasing wheel drive control must stop mower’s forward movement. If this feature fails to operate, disconnect spark plug wire and repair before using unit.
On self-propelled models, wheel drive must be disengaged when starting engine.
DO NOT operate on steep slopes.
NEVER leave unit unattended on a slope. Chock wheels if parking on a slope.
Mow across the face of slopes, never up and down. Be especially cautious when changing direction on slopes.
This product is equipped with an internal combustion engine. DO NOT use on or near any unimproved, forest or brush covered land unless the exhaust system is equipped with a spark arrestor meeting applicable local, state or federal laws. A spark arrestor, if used, must be maintained in effective working order by the operator. See your Ariens Dealer or engine manufacturer’s service center.

Fuel is highly flammable and its vapors can explode. ONLY use approved fuel containers.
- NO Smoking!
- NO Sparks!
- NO Flames!
- Allow engine to cool before filling fuel tank.

Never fill containers inside a vehicle or on a truck or trailer bed with a plastic liner. Always place containers on the ground away from your vehicle before filling.
When practical, remove gas-powered equipment from the truck or trailer and refuel it on the ground. If this is not possible, then refuel such equipment on a trailer with a portable container, rather than from a gasoline dispenser nozzle.
Keep the nozzle in contact with the rim of the fuel tank or container opening at all times until fueling is complete. Do not use a nozzle lock-open device.
Check fuel supply before starting engine.
DO NOT fill gasoline tank indoors, when engine is running, or while engine is hot. Allow engine to cool several minutes before removing fuel cap.
DO NOT overfill. Allow about 1/4" (6 mm) of tank space for fuel expansion.
Replace gasoline tank cap securely and clean any spilled fuel before starting engine.
If fuel is spilled on clothing, change clothing immediately.
NEVER store fuel inside where there is an open flame, such as a water heater.
ALWAYS drain fuel outdoors away from ignition sources.
ALWAYS shut off engine, and remove key, and close fuel shutoff valve when transporting unit on a truck or trailer.
Avoid Electric Shock. DO NOT disconnect wire from spark plug while engine is running.
Do NOT put battery in fire or mutilate.
Explosive Gases!
NO flames, NO sparks, NO smoking, near battery.
Poisonous battery fluid contains sulfuric acid. Contact with skin, eyes or clothing can cause severe chemical burns.
ALWAYS wear safety glasses and protective gear near battery.
ALWAYS keep batteries out of reach of children.
Battery posts, terminals and related
accessories contain lead and lead
compounds, chemicals known to the State of
California to cause cancer and reproductive
harm. Wash hands after handling.
Charge batteries in an open, well-ventilated
area, away from spark and flames. Unplug
charger before connecting or disconnecting
battery. Wear protective clothing and use
insulated tools.
Accidental engine start up can cause death or
serious injury. Except where specifically
recommended, ALWAYS stop engine,
remove key (electric start models), wait for
moving parts to stop, allow parts to cool and
disconnect spark plug wire before inspecting,
servicing, adjusting or repairing unit.
Keep mower free of grass, leaves, or other
debris build-up.
Keep equipment in good condition.
Maintain or replace safety and instruction
labels, as necessary.
Follow engine manufacturer’s safety
instruction when servicing engine.
Check all hardware at regular intervals,
especially blade attachment bolts. Keep all
hardware properly tightened.
An extension spring, when extended, stores
energy and can be dangerous. Always use
tools specifically designed for installing or
removing an extension spring. Always
compress or extend springs slowly.
Before tipping unit, remove fuel and battery (if
equipped).
Use extra care when loading or unloading
unit onto trailer or truck.
Ensure all wheel blocks, jack stands and tie
downs will support unit during maintenance.
Replace worn-out mufflers immediately.
Continued use could result in fire or
explosion.
Sharp edges can cut or amputate fingers or a
hand. Wrap blade or wear sturdy gloves to
service.
Only replace blades. NEVER straighten or
weld blades.
Use only replacement parts designed for your
unit. See your Ariens Dealer.
Allow engine to cool before storing in any
enclosure.
ALWAYS clean unit before extended storage.
See engine manual for proper storage.
DO NOT store unit inside a building with fuel
in the fuel tank where any ignition sources
are present.
Use only accessories which have been
approved by Ariens and are properly
installed.
Use only accessories or attachments that are
designed for your unit and that can be used
safely on your terrain.
Check attachments frequently and replace
worn or damaged components with
manufacturer’s recommended parts.
NOTE: Remove all foam packaging from the unit.

1. Remove mower and handlebar from carton.
2. Install the handlebars on the pivot pins attached to the handlebar uprights.

NOTE: Make sure the cables (connected to the handlebar) are on the left side of the unit.
3. Remove the handlebar mounting hardware from the handlebar uprights.
4. Rotate the handlebar up or down to the desired height and align the mounting holes with the holes in the handlebar upright.
5. Secure the handlebars in position with hardware removed in step 3.
6. Connect the engine/blade control cable to the engine. Route the z-bend cable end into engine shutoff lever as shown below. Insert the cable connector into the cable mounting bracket on the engine. Make sure the connector snaps into place securely.

8. Set-up mower for bagging, side discharge or mulching. See MOWER SET-UP on page 14.

**NOTE:** Bagging is not standard on push models. See ACCESSORIES on page 24 for kit part numbers.

10. Connect the battery. See BATTERY (electric start models) on page 21.

11. Connect spark plug wire.

12. Check the engine/blade control feature. Try starting the engine without the engine/blade control held against the handlebar. Engine must not start. If engine starts, stop engine and bring the unit to your dealer for adjustment or repair.

CONTROLS AND FEATURES
See Figure 6 for locations.

**WARNING:** Improper operation can lead to injury. Learn what the controls do and how they work. Thoroughly read and understand entire Operator Manual.

**CAUTION:** AVOID INJURY. Read and understand the entire Safety section before proceeding.

**Engine/Blade Control**

**CAUTION:** Check function of Engine/Blade Control regularly. Improper function of control could cause injury.

The engine/blade control must be held against the handlebar to start the engine and blade.

**NOTE:** For models 911112, 113 pivot the engine/blade control into position. Do not pull back toward the operator while starting the engine or the wheel drive may engage.

Engine/blade control feature on mower stops engine and blade within 3 seconds whenever operator releases handlebar. Check this feature frequently. If feature fails to operate, disconnect spark plug wire and adjust or have it repaired before using unit.

**Handlebar**
Adjust handlebar to a safe and comfortable height. See HANDLEBAR HEIGHT on page 19.

**Recoil Starter Handle**
When pulled, handle will turn engine over.

**CUTTING HEIGHT ADJUSTMENT**

**DANGER:** Avoid injury from rotating blade. ALWAYS shut off engine before adjusting cutting height.

**CAUTION:** On self-propelled models, both rear wheels must be set at same height or traction drive may not work properly.
To change cutting height, move cutting height levers one notch at a time on each wheel to set desired height (Figure 7).

**NOTE:** Each wheel on mower must be set at the same height for a level cut.

</tbody>
</table>

**Standard Models**

To change cutting height, move cutting height levers one notch at a time on each wheel to set desired height (Figure 7).

**NOTE:** Each wheel on mower must be set at the same height for a level cut.

**OPTIONAL CONTROLS**

**Primer Bulb**

Push the primer bulb in to add fuel for easier engine start.

**Wheel Drive Control (self-propelled models)**

**CAUTION:** Unit will move forward at engine start if wheel drive control is engaged. ALWAYS release wheel drive control before starting unit.

**NOTE:** Engine must be running for wheel drive to propel unit.

911111

To drive forward:

Slowly squeeze the wheel drive control toward the handlebar until you reach a comfortable ground speed. Hold the wheel drive control against the handlebar for full speed.

To stop:

Release wheel drive control.

---

**Rear**

Low  
High

**Front**

Low  
High

1. Cutting Height Lever

Figure 7

Figure 8
To drive forward:
Slowly pull the wheel drive control toward you until you reach a comfortable ground speed. Hold the wheel drive control in this position to maintain the speed.

To stop:
Release wheel drive control.

**Speed Control Knob (91112, 113)**
The speed control knob stops the wheel drive control’s travel which limits the unit’s maximum forward speed.

Turn the speed control knob counterclockwise to increase the unit’s maximum forward speed. Turn the speed control knob clockwise to decrease the unit’s maximum forward speed.

**Fuel Shutoff Valve (91112, 113)**
*IMPORTANT:* The fuel shutoff valve MUST be in the closed position prior to transporting the unit.

Open the fuel shutoff valve to operate the unit. Close the fuel shutoff valve when storing, transporting or servicing the unit.

**Choke Control (91112, 113)**
Move choke lever to the choke position to start a cold engine.

**Ignition Switch (91113)**

<table>
<thead>
<tr>

<th>2</th>
</tr>
</thead>
<tbody>
<tr>
<td>[Diagram of Ignition Switch]</td>
<td>A removable key operates the ignition switch. Turn the key to the start position (2) to start the unit. The key will spring back to the &quot;RUN&quot; position.</td>
</tr>
</tbody>
</table>

**RUN Position (1):** All controls are operable.

**START Position (2):** Starter turns over the engine.

**FILLING THE FUEL TANK**
To add fuel to fuel tank:
1. Put unit in open or well-ventilated area.
2. Stop engine and allow to cool.
3. Clean fuel cap and surrounding area.
4. Remove cap.

*IMPORTANT:* See engine manual for correct type and grade of fuel.

5. Fill fuel tank to within 1/4 in. (0.63 cm) below bottom of filler neck with unleaded gasoline. See SPECIFICATIONS on page 25.
6. Replace fuel cap and tighten.
7. ALWAYS clean any spilled fuel.
MOWER SET-UP

**CAUTION:** DO NOT operate mower unless either side discharge cover or side discharge deflector is installed. Thrown objects may cause damage or injury. Never operate unit with rear door open unless grass bag is in place.

**CAUTION:** If clog or obstruction prevents grass flow, release engine/blade control and disconnect spark plug wire before attempting to clear away any clogs.

To Bag (Optional on Push Models)

**CAUTION:** Check grass bag frequently for wear or deterioration. Replace worn or damaged bag with Ariens original equipment replacement bag only.

See Figure 11 on page 14.

1. Shut off unit.
2. Make sure mulch cover is closed and secured with knob.
3. Lift rear door and remove mulch plug, if necessary.
4. Seat bagger chute inside deck opening and on top of deck.
5. Hook grass bag frame on mounting pins.
6. Lower rear door.

There should be no openings between bagger chute and mounting surface after installing bag. If necessary, clear debris from bag mounting surfaces.

**Grass Bag Removal**

1. Shut off unit.
2. Lift rear door.
3. Use handle to lift bag off mounting pins.
4. Close rear door.

**NOTE:** Empty grass bag and clean mower pan after each use. DO NOT allow grass clumps or a grass coating to collect inside of grass bag or mower pan. Remove grass bag from mower, wash bag with hose and allow to dry.

To Side Discharge

See Figure 12 on page 15.

1. Shut off unit.
2. Remove grass bag.
3. Lift rear door and install mulch plug (see below).
4. Remove the knob from and then hold open the mulch cover.
5. Install the side discharge chute on stud on the mower. Make sure chute covers discharge opening.
6. Secure the chute with the knob removed in step 4 and then close the mulch cover.

---

Figure 11

1. Rear Door
2. Bagger Chute
3. Mounting Pin
4. Grass Bag Frame
To Mulch
See Figure 13 on page 15.
1. Shut off unit.
2. Remove grass bag and side discharge chute, if installed.
3. Make sure mulch cover is closed and secured with knob.
4. Lift rear door and insert mulch plug with the beveled face to the left.
   There should be no openings between mulch plug and mounting surface of the deck.
5. Close rear door.
NOTE: Rear door must close flush.

EMERGENCY STOPPING
To stop the mower in an emergency:
1. Release the engine/blade control.
2. Release the wheel drive control (self-propelled models).
3. Allow all moving parts to stop before leaving operator’s position.

STARTING AND SHUT OFF

WARNING: Improper operation can lead to injury. Learn what the controls do and how they work. Thoroughly read and understand entire Operator Manual.

See Figure 6 for all Controls and Features.
NOTE: Start engine on a level surface that is free of debris.
Manual Start

1. Check each item in the Before Each Use section of the MAINTENANCE SCHEDULE on page 17.
2. Open fuel shut off valve (911112, 113).
3. For engines with a primer, push primer bulb 2 or 3 times for a cold engine.

NOTE: It is unnecessary to prime or choke a warm engine.

4. For engines with a throttle, place throttle control in the choke position. Once the engine has started, place throttle in the high speed detent.
5. With engine/blade control held against the handlebar, grasp starter handle and pull rope slowly until it pulls harder. This is the compression stroke. Let rope rewind slowly.
6. Pull rope with rapid continuous full arm stroke to start engine. Allow rope to rewind slowly.

IMPORTANT: DO NOT let starter handle snap against bracket.
7. Repeat steps 4 and 6 until engine starts. (If engine does not start, see TROUBLESHOOTING on page 23.)

Electric Start (911113)

Recoil may also be used to start the engine (see Manual Start on page 16).

1. Check each item in the Before Each Use section of the MAINTENANCE SCHEDULE on page 17.
2. For engines with a primer, push primer bulb 2 or 3 times for a cold engine.

NOTE: It is unnecessary to prime or choke a warm engine.

3. With engine/blade control held against the handlebar, turn the key to “Start” position to crank engine and release key when engine starts.

IMPORTANT: Do not run starter continuously for more than fifteen seconds. If the engine does not start after several attempts, refer to TROUBLESHOOTING on page 23.

Shut Off

1. Release wheel drive control and allow unit to stop completely (self-propelled models).
2. Release engine/blade control.
3. Turn key to off position and then remove key (electric start models).

Mowing Tips

Cut grass when it is dry.
Keep mower blades sharp.
Do not set cutting height too low. For tall grass, mow twice.
Do not mow too fast.
Mow with engine at full throttle. Discharge clippings into areas already cut.
Vary cutting pattern with each mowing.

NOTE: To prevent dirt and grass from collecting on mower pan, avoid operating over bare ground with only patches of grass.

Mulching Tips

For best mulching performance, cut no more than 1 inch (2.54 cm) of grass per cutting.
Ariens Dealers will provide any service, parts or adjustments which may be required to keep your unit operating at peak efficiency. Should engine require service, contact an Ariens Dealer or an authorized engine manufacturer’s service center.

MAINTENANCE SCHEDULE
NOTE: Some working conditions (heavy loads, high ambient temperatures, dusty conditions, or airborne debris) may require more frequent service. See engine manual for further maintenance and troubleshooting information.

CHECK ENGINE/BLADE CONTROL
The engine and blade must stop within 3 seconds after releasing the control. If the engine and blade continue to run, adjust or repair control immediately.

CHECK WHEEL DRIVE CONTROL (self-propelled models)
The unit must stop quickly and completely when the control is released. Adjust or repair if necessary. See WHEEL DRIVE CONTROL ADJUSTMENT (self-propelled models) on page 22.

CHECK GRASS BAG (if equipped)
Check grass bag frequently for wear or deterioration. Replace worn or damaged bag with Ariens original equipment replacement bag only.

CLEAN UNIT
Before each use clean unit, muffler and engine surfaces of debris, oil or fuel spills to ensure proper cooling and prevent fires.

CHECK ENGINE OIL
IMPORTANT: Maintain proper oil level at all times or engine damage will result. Check the level of the engine crankcase oil before each use. Make sure engine is level when checking oil. See engine manual for instructions.

CHECK MOWER BLADE
See Figure 14.
Check blade mounting: blade must be secure and bolt torqued to 37.5 - 50 lbf-ft (51-68 N·m) (bolt should fully compress lock washer).
Check blade for nicks and dull cutting edges. Sharpen if necessary.
Check blade for rounded or broken ends, thinned metal or other damage. Replace if necessary.
NOTE: Blades should be sharpened and balanced professionally. Contact your Ariens Dealer.

To remove blade:
1. Stop engine, wait for all moving parts to stop, and disconnect spark plug wire.
2. Block blade to prevent rotation.
3. Remove bolt, lock washer, flat washer and blade from shaft.

To install blade:
1. Replace blade, flat washer, lock washer and bolt on shaft.
2. Torque bolt to 37.5 - 50 lbf-ft (51-68 N·m) (bolt should fully compress lock washer).
3. Connect spark plug wire.

Sharpen the Mower Blades

**CAUTION:** DO NOT sharpen mower blades while on unit. An imbalanced mower blade will cause excessive vibration and eventual damage to unit. Check mower blade balance before reinstalling blades. NEVER weld or straighten bent blades.

1. Remove mower blade from unit. Discard mower blade if:
   - More than 1/2 in. (1.27 cm) of metal is removed.
   - Air lifts become eroded.
   - Blade is bent or broken.
2. Sharpen mower blade by removing an equal amount of material from each end of mower blade. DO NOT change angle of cutting edge or round the corner of the mower blade.
3. Check mower blade balance. Slide mower blade on an unthreaded bolt. A balanced blade should remain in a horizontal position. If either end of mower blade moves downward, sharpen the heavy end until blade is balanced (Figure 15).
4. Install mower blade on unit. Tighten the bolts to a torque of 37.5 - 50 lbf-ft (51-68 N·m).

---

**CHECK DRIVE BELT (self-propelled models)**

Check drive belt and replace if worn or damaged. See DRIVE BELT REPLACEMENT (self-propelled models) on page 20.

**CHECK FASTENERS**

Check all fasteners for proper tightness. Pay special attention to blade hardware and all guards, shields and safety devices.

**CHECK AIR CLEANER**

See engine manual for specific information.

**CHANGE ENGINE OIL**

**IMPORTANT:** Change engine crankcase oil after first five (5) hours of operation. Then change oil after every 25 hours of operation. Refer to engine manual for instructions and proper oil type.

**IMPORTANT:** Proper oil level must be maintained at all times or engine damage will result. DO NOT overfill. Be sure engine is level when adding oil.

**GENERAL LUBRICATION**

**NOTE:** The mower transmission is lubricated and sealed at the factory. It should need no routine lubrication. If the transmission leaks grease, bring the mower to your local Ariens dealer for repair.
CHECK SPARK PLUG
Spark plug should be replaced every 100 hours of operation or each year.

NOTE: Loose spark plug wire terminals can cause sparking. Replace terminal if damaged.

CHECK ENGINE COOLING
To prevent overheating, air must circulate freely around the cooling fins, cylinder head and block.
Every 100 hours of operation or yearly (more often if conditions require) remove blower housing and clean cooling fins. See engine manual for instructions.

CHECK MUFFLER
Check muffler for debris, cracks, wear, or other damage.

CAUTION: Replace worn-out mufflers immediately. Continued use could result in fire or explosion.

SERVICE AND ADJUSTMENTS

SERVICE POSITION
Put unit into service position for easy access to underneath the deck.

CAUTION: Avoid fuel spills. Follow steps below to help prevent fuel spills. If fuel leaks into air cleaner, replace air cleaner. ALWAYS clean up any spilled fuel.

1. Place unit on a flat, level surface.
2. Disconnect spark plug wire from spark plug.
3. Remove fuel cap, place a piece of plastic bag over the opening and tighten cap securely.
4. Tip unit onto right side (911112, 113).
   Tip unit onto left side, opposite the discharge opening (911110, 111).
   Make sure unit is secure and will not tip over.

IMPORTANT: Remove plastic from fuel cap after unit is upright and service is complete.

HANDLEBAR HEIGHT
To adjust (Figure 16):
1. Remove hardware from lower handlebar mounting hole.
2. Rotate the handlebar up or down to the desired height and align the mounting holes with the holes in the handlebar upright.
3. Secure the handlebars in position with hardware removed in step 1.

NOTE: To fold handlebars flat for storage, remove the hardware from the lower handlebar mounting holes, rotate the handlebars forward, and then replace the hardware in the holes on the handlebar upright.

CAUTION: AVOID INJURY. Read and understand the entire Safety section before proceeding.

WARNING: HOT SURFACES can cause death or serious injury. DO NOT TOUCH parts which are hot from operation. ALWAYS allow parts to cool.

CAUTION: Avoid fuel spills. Follow steps below to help prevent fuel spills. If fuel leaks into air cleaner, replace air cleaner. ALWAYS clean up any spilled fuel.
DRIVE BELT REPLACEMENT
(self-propelled models)

To remove drive belt:
1. Disconnect spark plug wire from spark plug.
2. Remove transmission cover.
3. Disconnect idler return spring from idler arm. See Figure 17.
4. Disconnect the wheel drive cable from transmission mount, and then disconnect drive cable spring from idler arm.
5. Remove belt from transmission input pulley and transmission idlers, and then push the belt out through the belt channel.
6. Put the unit in the service position. See SERVICE POSITION on page 19.
7. Remove blade and blade adapter from the crank shaft.
8. Remove the belt from the engine pulley, and then pull the belt through the belt channel. See Figure 18.

To install the drive belt:
IMPORTANT: Be sure the belt seats in idler and pulley grooves with the idler touching the back (flat) side of belt.
1. Install the new belt on the transmission input pulley and idlers, route it through the belt channel, and then install the belt on the engine pulley. See Figure 19.
2. Connect the wheel drive cable spring to the idler arm as shown in Figure 20, and then connect the wheel drive cable to the transmission mount. See Figure 17.

3. Connect the idler return spring to the idler arm.

4. Install the blade adapter and blade on the crankshaft. Make sure the blade hardware is tightened to the proper torque. See To install blade: on page 17.

5. Replace the transmission cover.

6. Connect spark plug wire to the spark plug.

ENGINE/BLADE CONTROL ADJUSTMENT

NOTE: The engine/blade control has no user serviceable adjustments. If the engine/blade control does not stop the engine or blade within 3 seconds of releasing the control bail, take the unit to an authorized Ariens dealer for repairs.

BATTERY (electric start models)

WARNING: AVOID INJURY. Read and understand the entire Safety section before proceeding.

WARNING: Battery posts, terminals and related accessories contain lead and lead compounds, chemicals known to the State of California to cause cancer and reproductive harm. Wash hands after handling.

NOTE: Unit comes equipped with a maintenance-free battery that requires no regular maintenance except cleaning the terminals.

To Remove Battery from Unit
1. Disconnect negative (−) cable first, then positive (+) cable (Figure 21).
2. Remove battery cover and battery. Save mounting hardware for reinstallation.

To Replace Battery on Unit
1. Hold battery and battery cover in place against mower frame.
2. Secure with the hardware removed above.
3. Connect negative (−) cable first, then positive (+) cable (Figure 21).

To Charge Battery
NOTE: Engine does not charge the battery. Battery will require periodic charging to ensure proper starting.

IMPORTANT: DO NOT attempt to “jump start” mower.

IMPORTANT: DO NOT start engine while the charger is connected to wiring harness.

1. Connect battery charger to the wiring harness. See Figure 22.
2. Plug charger into 110 volt Alternating Current (A.C.) outlet.

IMPORTANT: Battery charger supplied with unit is for 110 volt Alternating Current (A.C.) outlets only.

3. Charge for 24 to 48 hours (battery may be charged for up to 52 hours without damaging it).
WHEEL DRIVE CONTROL ADJUSTMENT (self-propelled models)

See Figure 23.

NOTE: The unit should stop immediately when the wheel drive control is released, and the unit should not creep forward when the wheel drive control is disengaged with the engine running. The unit’s forward speed should increase as the wheel drive control gets closer to the handlebar.

If the unit creeps, decrease traction and speed. If the unit does not accelerate smoothly or seems to slip under load, increase the traction and speed.

NOTE: Before adjusting the wheel drive cable, first make sure the area around the drive components is free of dirt or debris that could prevent the transmission from engaging or disengaging properly, and then make sure the return spring is connected properly to idler arm.

Adjust the wheel drive by adjusting the cable on the handlebar.

IMPORTANT: DO NOT adjust the cable so the transmission does not return to neutral and stop the unit when the control bail is released.

Check the adjustment

1. Start the engine and slowly squeeze the wheel drive control against the handlebar and then release the wheel drive control.

2. The unit should move forward as you squeeze the wheel drive control and then stop immediately and not "creep" slowly forward when you release it.

To adjust:

1. Move the wheel drive cable adjuster up or down the handlebar. See Figure 23.

To increase traction and speed, move the cable adjuster down the handlebar.

To decrease traction and speed, move the cable adjuster up the handlebar.

2. Check the adjustment and readjust as needed.
**STORAGE**

**IMPORTANT:** NEVER spray unit with high-pressure water or store unit outdoors. Store mower in a cool, dry, protected location.

**Cleaning**
Allow unit to cool. Clean unit thoroughly with mild soap and low pressure water. Brush off dirt and debris from all surfaces. Touch up all scratched surfaces to prevent rust. Matching touch-up paint is available from your Ariens Dealer. Do not use abrasives, solvents, or harsh cleaners.

**CAUTION:** AVOID INJURY. Read and understand the entire Safety section before proceeding.

**Inspection**
Inspect mower and repair or replace worn or damaged parts to avoid delays when beginning use again. Regularly check all hardware and keep fasteners tight. Know unit is in safe working condition.

**Grass Bag**
Wash out grass bag and allow to dry before storage. Grass bag may be stored in position on mower.

**Engine**
Close fuel shutoff valve (911112, 113). When storing unit for extended periods of time, remove all fuel from tank and carburetor (run dry). Refer to engine manual.

**TROUBLESHOOTING**

Ariens Limited Warranties

2-Year Limited Lawn and Garden Consumer Warranty

Ariens Company (Ariens) warrants to the original purchaser that Ariens and Gravely brand consumer products manufactured by Ariens Company will be free from defects in material and workmanship for a period of two (2) years after the date of purchase, and that Ariens will repair any defect in material or workmanship, and repair or replace any defective part, subject to the conditions, limitations and exclusions set forth herein. Such repair or replacement will be free of charge to the original purchaser (labor and parts), except as noted below.

The two-year duration of this warranty applies only if the product is put to ordinary, reasonable, and usual personal, family, or household uses. If the product is put to any business, commercial, or industrial use such as, but not limited to, commercial landscaping, mowing or snow removal services, or golf course or park maintenance, or agricultural or farmstead use, then the duration of this warranty is ninety (90) days after the date of purchase, or one (1) year after the date of purchase if the product is labeled as a Professional/Commercial Product. The duration of this warranty shall be ninety (90) days after the date of purchase if any product is rented or leased.

2-Year Limited Lawn and Garden Commercial Warranty

The Ariens Company (Ariens) warrants to the original purchaser that all Gravely Pro and ProMaster products manufactured by Ariens will be free from defects in material and workmanship for a period of two (2) years after the date of purchase or 1000 hours of use, whichever comes first. An authorized Gravely dealer will repair any defect in material or workmanship, and repair or replace any defective part, subject to the conditions, limitations and exclusions set forth herein. Such repair or replacement will be free of charge to the original purchaser (labor and parts), except as noted below.

The duration of this warranty shall be ninety (90) days after the date of purchase or 1000 hours of use, whichever comes first, if any product is rented or leased.

3-Year Limited Sno-Thro Warranty

Ariens Company (Ariens) warrants to the original purchaser that Sno-Thro products manufactured by Ariens Company will be free from defects in material and workmanship for a period of three (3) years after the date of purchase, and will repair any defect in material or workmanship, and repair or replace any defective part, subject to the conditions, limitations and exclusions set forth herein. Such repair or replacement will be free of charge to the original purchaser (labor and parts), except as noted below.

The three-year duration of this warranty applies only if the product is put to ordinary, reasonable, and usual personal, family, or household uses. If the product is put to any business, commercial, or industrial use, then the duration of this warranty is ninety (90) days after the date of purchase, or one (1) year after the date of purchase if the product is labeled as a Professional/Commercial Product. The duration of this warranty shall be ninety (90) days after the date of purchase if any product is rented or leased.

DURA-CLEAN™ Auger Limited Lifetime Warranty

Ariens Company (Ariens) warrants to the original purchaser that the rubber components of the DURA-CLEAN™ Auger manufactured by Ariens Company will be free from defects in material and workmanship and will not wear out for the life of the Sno-Thro, except as noted below.

Ariens Company will provide for the replacement of any of the rubber components of the DURA-CLEAN™ Auger found upon examination by the Ariens Company to be defective or worn out. Replacements will be supplied free of charge. Labor is not included after two (2) years from the date of purchase of the Sno-Thro.

The lifetime limited warranty shall apply if the product is put to ordinary, reasonable, and usual personal household use. If the product is put to any business, commercial, industrial, rental, or leased use, the warranty shall be against defects in material and workmanship for ninety (90) days following the date of purchase.
Exceptions, Limitations, Exclusions

These warranties are subject to the following conditions, limitations, and exclusions:

To obtain warranty service, the following conditions must be met:

- The purchaser must perform the maintenance and minor adjustments explained in the owner’s manual.
- The purchaser must promptly notify Ariens Company or an authorized Ariens service representative of the need for warranty service.
- The purchaser must transport the product to and from the place of warranty service.
- Warranty service must be performed by a respective Ariens or Gravely authorized service representative.
- To find an Ariens or Gravely authorized service representative, contact Ariens at:
  655 W. Ryan St, P.O. Box 157
  Brillion, WI 54110-0157
  (920) 756 - 2141
  www.ariens.com
  www.gravely.com

This warranty is subject to the following limitations:

- Genuine Ariens or Gravely brand service parts and accessories not purchased with the product covered by this warranty, but which are later purchased and used with that product, are warranted to be free from defects in material and workmanship for a period of ninety (90) days after date of purchase, and Ariens Company will repair or replace any such part or accessory free of charge, except for labor, during that period.
- Batteries are warranted only for a period of twelve (12) months after date of purchase, on a prorated basis. For the first ninety (90) days of the warranty period, a defective battery will be replaced free of charge. If the applicable warranty period is more than 90 days, Ariens Company will cover the prorated cost of any defective battery, for up to twelve (12) months after the date of purchase.

The following items are excluded from this warranty:

- Engines and enty and are not covered by this warranty.
- Hydro-Gear transmissions and/or Hydro-Gear drive components are covered only by the Hydro-Gear warranty and are not covered by this warranty.
- Parts that are not genuine Ariens or Gravely brand service parts are not covered by this warranty.
- Except as specifically warranted, normal maintenance, services, and normal replacement items, such as spark plugs, oil, oil filters, air filters, mufflers, belts, tires, shoes, runners, scraper blades, shear bolts, mower blades, mower vanes, headlights, light bulbs, knives, etc. are not covered by this warranty except as noted below.
- Mufflers, belts, and tires on consumer lawn and garden products are warranted to the original purchaser for two years.
- Friction discs, idlers, cables, and electrical components on Sno-Thros put to usual personal household use are warranted to the original purchaser for two years.
- Any defect which is the result of misuse, alteration, improper assembly, improper adjustment, neglect, or accident is not covered by this warranty.

This warranty applies only to products purchased in the United States (including Puerto Rico) and Canada. In all other countries, contact place of purchase for warranty information.

Ariens may from time to time change the design of its products. Nothing contained in this warranty shall be construed as obligating Ariens to incorporate such design changes into previously manufactured products, nor shall such changes be construed as an admission that previous designs were defective.

LIMITATION OF REMEDY AND DAMAGES

Ariens Company’s liability under this warranty, and under any implied warranty that may exist, is limited to repair of any defect in workmanship, and repair or replacement of any defective part. Ariens Company shall not be liable for incidental, special, or consequential damages (including lost profits). Some states do not allow the exclusion of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

DISCLAIMER OF FURTHER WARRANTY

Ariens Company makes no warranty, express or implied, other than what is expressly made in this warranty. If the law of your state provides that an implied warranty of merchantability, or an implied warranty of fitness for particular purpose, or any other implied warranty, applies to Ariens Company, then any such implied warranty is limited to the duration of this warranty. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
WARNING

The engine exhaust from this product contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.
